

## BUNGE OILSEED PROCESSING

North America's  
leading oilseed  
processor

Bunge North America's Oilseed Processing unit purchases soybeans, canola, flaxseed and specialty oilseeds from top growers, dealers and the Company's Grain unit and processes them into protein meal for domestic and export sales to the animal feed industry. Soy and canola oil are sold as crude to major food manufacturers or refined by Bunge Oils. Crude may also be sold for use in various industrial applications.

Bunge Oilseed Processing is the largest processor of canola in Canada and the second largest soybean crusher in the United States. Our customers rely on us for consistent, high-quality products and services.

**OUR PRODUCTS INCLUDE:**

- ▶ Soybean meal
- ▶ Soybean crude oil
- ▶ Canola meal
- ▶ Canola crude oil
- ▶ Soybean hulls
- ▶ Soybean hull pellets
- ▶ Canola pellets
- ▶ Other oils

Protein meal is a primary ingredient in all classes of livestock feed. Bunge Oilseed Processing offers consistent quality soybean meal, canola meal and linseed meal, as well as reliable service for livestock and poultry feeding requirements.

Bunge Oilseed Processing also provides soybean and canola oil to leading food manufacturers for use as a quality ingredient in some of North America's most popular foods and for non-food applications.

**A FIRM GRASP OF OUR CUSTOMERS' BUSINESS**

Because we want our customers to view us as partners, we make it a point to understand everything we can about their business. We don't just take orders. We spend time at their business learning how what we do impacts their operations. By working together, we can provide better, more valuable service and market information.

This close connection with our customers also gives us the insight to anticipate customer trends and technological innovations. In fact, finding ways to be a valuable resource to our

**OUR CUSTOMERS**

*At Bunge Oilseed Processing, the majority of our customers are feed manufacturers. But we also consider farmers some of our most valuable customers. They provide the top quality oilseeds that allow us to serve the following:*

- ▶ Animal feed manufacturers
- ▶ Food manufacturers
- ▶ Bunge Oils
- ▶ Non-food industries

customers is part of every thing we do, from origination and logistics, to research and development, to risk management and everything in between.

**STILL GROWING** At Bunge, we're not content to be the best today; we want to be the best

tomorrow, too. Whether it is investing in our information technology to provide better, more accurate and timely information or investing in our facilities to ensure we have the resources to meet the demands of a growing market, Bunge Oilseed Processing is committed to providing outstanding service to our customers.

An important step in customer service was the integration of our business with Central Soya in the United States and CanAmara Foods in Canada in 2002. This combined business provides a breadth of products and

services we couldn't offer before. While Bunge Oilseed Processing is now larger and more diverse, we have intentionally remained decentralized in many of our operations. This gives our team more autonomy to make faster decisions in response to local markets and needs.

We like to think that we give our customers the best of both worlds — a global perspective of the marketplace combined with individualized attention.

#### **ABOUT BUNGE NORTH AMERICA**

Bunge Oilseed Processing is a business unit of Bunge North America, the North American operating arm of Bunge Limited, a vertically integrated food and feed ingredient company supplying raw and processed agricultural commodities and specialized food ingredients to a wide range of customers in the livestock, poultry, food processor, foodservice and bakery industries. Headquartered in St. Louis, Missouri, Bunge North America operates grain elevators, oilseed processing facilities, edible oil refineries and packaging plants, and corn dry mills in the U.S., Canada and Mexico.

#### **ABOUT BUNGE LIMITED**

Bunge Limited (NYSE: BG) is an integrated, global agribusiness and food company operating in the farm-to-consumer food chain. Founded in 1818 and headquartered in White Plains, New York, Bunge is the world's leading oilseed processing company, the largest producer and supplier of fertilizers to farmers in South America and the world's leading seller of bottled vegetable oils to consumers.
