

BUNGE OILS

Between
commodities and
food products
comes innovation

Bunge Oils, a business unit of Bunge North America, transforms commodity oils into value-added food ingredients for consumer food products. Bunge Oils' products are sold in markets that reach consumers everywhere, every day.

OUR CUSTOMERS Bunge Oils is equipped to provide customized formulations and expert technical assistance to customers in the following industries:

- ▶ Major food manufacturers
- ▶ Foodservice
- ▶ Baking
- ▶ Snack foods
- ▶ Confections
- ▶ Private label retail oils
- ▶ Non-food uses

HOW OUR UNIQUE EXPERTISE BENEFITS OUR CUSTOMERS Because Bunge Oils is so closely tied to the food industry, we are in a position to anticipate market trends that could put our customers a step ahead. As a result, we're typically developing healthier product formulations long before our customers come to us with a request. Our size is another advantage for our customers. As part of Bunge, the world's largest oilseed processor, we offer our customers a worldwide view, while remaining flexible enough to partner with them to address more local concerns. Our sales team is supported by a research and development team that can help food processors and foodservice operators improve their existing business and develop new products.

OUR PRODUCTS

Bunge Oils sources soybean and canola oil from the Company's Oilseed Processing unit and further refines it into shortenings, margarines and salad and cooking oils. Food manufacturers then use these products to make snack foods, cookies, cakes, crackers and icings. Restaurants trust Bunge Oils' products in their most popular menu items.

SOLVING TOMORROW'S CHALLENGES TODAY

Innovation is Bunge Oils' strong suit.

As research continues to identify the health implications of dietary fat, Bunge Oils continues to provide solutions that keep our customers on the cutting edge. We've developed proprietary processes that allow us to offer our customers a number of trans fat alternatives.

We also work with other companies to expand the solutions we can offer to our customers. Our alliance with DuPont has resulted in NUTRIUM™ Low Linolenic soybean oil, a product that has better natural stability and a longer shelf life than traditional soybean oil.

Bunge Oils is also focusing on emerging markets. Delta™ SL is a Bunge Oils patented formulation that has captured the interest of major food manufacturers. This all-natural vegetable oil metabolizes more quickly, inhibiting the body's ability to absorb cholesterol. It has a lighter, cleaner flavor than other popular cooking oils and performs equally well as a salad oil.

Locations and logistics

Bunge Oils operates food oil refineries and packaging plants throughout the United States and Canada. These facilities can produce oil in large quantities for major food manufacturers or blend special formulas for small restaurants.

MORE INNOVATIONS ON THE HORIZON

At Bunge Oils, we're never content with the status quo. Listening is one of the most important things we do because the goals of our customers help shape our vision of what Bunge Oils will be tomorrow.

As we look to the future, we know that technology will play an increasingly important role in our ability to effectively serve our customers. That's why Bunge is investing millions of dollars in information technology. We want to provide our customers with the timely, accurate information they need for important business decisions.

We are also investing in our own facilities to ensure that we have state-of-the-art equipment capable of turning the latest innovations in shortenings and oils into products our customers can use.

In other words, our vision for the future is geared not only to growing our business, but to helping our customers grow their businesses as well. Helping customers achieve their goals influences everything we do.

ABOUT BUNGE NORTH AMERICA

Bunge Oils is a business unit of Bunge North America, the North American operating arm of Bunge Limited, a vertically integrated food and feed ingredient company supplying raw and processed agricultural commodities and specialized food ingredients to a wide range of customers in the livestock, poultry, food processor, foodservice and bakery industries. Headquartered in St. Louis, Missouri, Bunge North America operates grain elevators, oilseed processing facilities, edible oil refineries and packaging plants, and corn dry mills in the U.S., Canada and Mexico.

ABOUT BUNGE LIMITED

Bunge Limited (NYSE: BG) is an integrated, global agribusiness and food company operating in the farm-to-consumer food chain. Founded in 1818 and headquartered in White Plains, New York, Bunge is the world's leading oilseed processing company, the largest producer and supplier of fertilizers to farmers in South America and the world's leading seller of bottled vegetable oils to consumers.
