

About Our Oil.

At Bunge we have spent decades developing bio-based oils. Our AgriTech® oils, made from soybeans grown in North America, perform just like petroleum. But more important, they provide you with an environmentally responsible and renewable resource when used as a hydraulic fluid or lubricant. The environment is everybody's. Working together we can share responsibility for keeping it green by ensuring you know beans about our beans.

For more information call 800.828.0800 or visit www.BungeAgriTech.com
